There seems to be a misunderstanding about using R-12 and POE oil. Many contractors and end users believe it is OK to use them together, but in truth, they may be setting themselves up for some real problems.

Through numerous laboratory and field tests, Emerson Climate Technologies, Inc. has discovered that when moisture is induced into a system using R-12 refrigerant and POE oil, the refrigerant becomes acidic and may plug cap tubes and orifices. For this reason, Emerson Climate Technologies, Inc. does not recommend using R-12 and POE oil together.

For more information, go to www.EmersonClimate.com/refrigerantschart to view the “Refrigerants/Lubricants Approved For Use In Copeland® Compressors’ chart, Form No. 93-11.
